

FLEET-EYE MOBILE

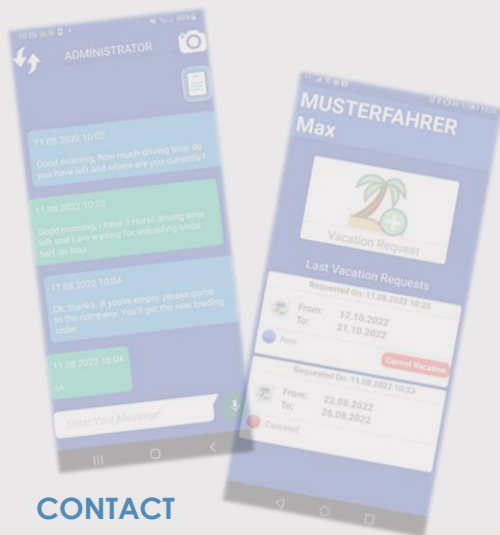

FLEET-EYE MOBILE

Fleet-Eye Mobile was developed to support your employees in personnel and fleet management, but also the driving personnel, in their daily administrative work in a simple manner.

The intelligent integration of NFC technology makes workflows even easier and the error rate is significantly reduced.

Fleet-Eye Mobile includes the following modules and functions:

- Messages
- Task management
- Driver license check
- Equipment/departure check
- Sick certificate
- Damage report
- Vacation request
- Working time
- Documents
- Links

MESSAGES

Function

Simple and fast communication, automatic text translation and transmission of images.

TASK MANAGEMENT

Function

The driver can be assigned tasks via the head office, which are clearly displayed in his personal Fleet-Eye mobile app.

DRIVER LICENSE CHECK

Function

The driver is reminded to carry out the driver license check in a selected period.

EQUIPMENT/DEPARTURE CHECK

Function

The equipment is checked by the driver for completeness, defects are documented and forwarded to the head office. Any damage can be documented directly via the app by photo.

SICK CERTIFICATE

Function

Sickness reports via app including adding of pictures, such as medical confirmation, sick report, etc. is possible.

DAMAGE REPORT

Function

Damage can be recorded by the driver, explanatory images can be added.

VACATION REQUEST

Function

The driver can request a vacation via app at the head office.

WORKING TIME

Function

Working time is recorded by the app and forwarded to the head office.

DOCUMENTS

Function

PDF documents can be sent to staff or vehicles (individual, all, groups).

LINKS

Function

Individual internet links can be defined and opened on the mobile page.
